

# GREAT WHITE KAOLIN PROJECT PROJECT CONTEXT

*To the extent that is possible, there will be no adverse impact on community amenity and wellbeing as a result of mine construction and operations.*

In South Australia, the Department for Energy and Mining (DEM) is the Regulator who assesses Mining Proposals. Other government departments, agencies, and the public can provide comment while the Mining Proposal is being considered by DEM, which may then recommend the grant of a Mining Lease and any associated Miscellaneous Purposes Licences by the Minister for Energy and Mining.

A defined process is undertaken, as shown below.

*A Mining Proposal is developed in consultation with stakeholders.*

A Mining Proposal which includes the Mining Lease Application and associated Miscellaneous Purposes Licences are planned to be submitted to DEM by the end of the 1st quarter 2021.

The Regulator reviews all aspects of the Proposed Development during assessment to ensure:

- there is a reasonable prospect that a mineral resource can be 'effectively and efficiently mined'.
- all potential environmental impacts (including ecology, soils, heritage, air quality, noise, traffic, groundwater and surface water) have been identified.
- the proposed level of impact (environmental outcome) is acceptable given the economic and social benefits.
- the proposed control strategies will achieve an acceptable level of impact.
- there is a control mechanism at all stages during the development of the Great White Kaolin Project.
- that the Applicant works to ensure regulatory requirements and community expectations are met at all stages of the mine development, operation and closure.

## COMMUNITY ENGAGEMENT

The Applicant recognises that engagement with the community and stakeholders is an ongoing and continuous process.

Understanding the views of the community is a priority for the Applicant. *We are committed to working with the community with open and transparent communication.* To provide feedback on the Great White Kaolin Project, visit [www.andromet.com.au](http://www.andromet.com.au)
